

*A native of Columbia County and graduate of Bloomsburg Area School District. I attended Shippensburg University before enlisting in the Air Force serving in Desert Storm, Desert Shield, and the Gulf War as an Aviatinal Meteorologist specializing in Electro-Optical Tactical Data Acquisition. I ran a volunteer network while in service enabling servicemen and women an opportunity to support their local community through the Idaho Fish and Game Commission. I have become a jack of many trades as I have worked in daycare centers, helped develop memory chips for flat screen TVs before they were available to the public, worked for Columbia County's Transportation Department, was a vet tech in local veterinarian clinics, I did title work for a real estate office, plus a few other odd jobs to keep myself busy. In the early days of the Children's Museum, I produced an educational display on the weather for the museum's use. I have been with the Columbia-Montour Visitors Bureau for the last 13 years as their Member Liaison.*

*I have a large amount of hobbies including amateur photography, crafting, gardening, hunting and fishing, metal detecting, hiking, and exploring old places. Anything to get me out of the house!*

*After living in so many different places, my husband and I have learned that this region is where we wanted our son to grow up. We now live on a small farm in northern Columbia County.*
